

Yum! React Coding Challenge

Thanks for taking the challenge. We hope you find this a fun and thought-provoking exercise. You have been asked to demonstrate your React and web development skills.

Requirements

- Create a React app that allows a user to see all the employees at a specific location
- Your app should also allow a user to view all employees based on a name prefix
 - i.e. name prefix "Mi" would match Michael and Mike but not John
- Your app should run in the browser
- Your app should retrieve the employee data from the remote data source
- Feel free to use whichever libraries + design patterns you are comfortable with

Really Nice To Have

- Add at least one test for your app
- Optimize the app for Desktop and Mobile

Data Source

Employee information JSON

https://airro-yum.s3-us-west-2.amazonaws.com/recruiting/challenge_data/employees.json

Submission

Provide the source code to your project through a file or code repository
